

**PIONEERS** IN ALL-IN-ONE COMPUTING PRODUCTS FOR 20+ YEARS

**CUTTING EDGE** ODM WITH OFFICES AROUND THE GLOBE

**INNOVATIVE** TECHNOLOGY WITH A LESS THAN 2% FAILURE RATE

**For 21st century computing solutions**, our all-in-one technology, global presence, and dedicated team of professionals stand head and shoulders above the competition.

**13,000**  
CUSTOMERS IN

**60+**  
COUNTRIES

**450**  
EMPLOYEES

**20+**  
YEARS

**450 Employees** support over **13,000 customers** in **60+ Countries**: providing state-of-the-art computers in a variety of industries for **20+ years**.

## INDUSTRIES

### HEALTHCARE

Our medically-certified computers are found in healthcare facilities all over the world: featuring UL60601-1/EN60601-1 electrical safety standard certification, IP65 ratings against dust and liquid, 2-factor authentication security protocols, antimicrobial housings, and long life cycles for superior ROI.

### INDUSTRIAL & MANUFACTURING

Industrial and manufacturing settings take a tougher kind of machine to do the job. Our industrial-grade panel PCs and rugged mini PCs can withstand the harshest environments: built with military-grade components and adopting zero-maintenance fanless designs for superior performance.

### ENTERPRISE

Every business is different, and yours requires computing solutions that change with its growing needs. Our all-in-one enterprise-grade computers are VESA mountable, touchscreen capable and offer greater flexibility than commercial-grade PCs, plus fully customizable options for greater power, speed and data storage.

## THE CYBERNET DIFFERENCE

When you partner with Cybernet, you get more than just a computer. Our systems are tailored to meet your needs and budget, with a wealth of customizable options inside and out. Get exactly what you need, then add features to address new challenges as they arise.

Cybernet stands by its product line with the best customer service in the industry. Dedicated local account managers are standing by to address any concerns you may have, along with extended warranties and lifetime technical support just a phone call away!

When it comes to reliability Cybernet products lead the field. Our computers are designed for 24/7 operation with available fanless options, feature industrial-grade components, and a failure rate of less than 2%. No matter how tough the conditions, you can count on Cybernet.

## 5 LOCATIONS WORLDWIDE

With 5 locations across the globe – including Australia, Taiwan, China and the UK, as well as our headquarters in Irvine, CA – we're set up to provide swift local service to over 13,000 customers in 60+ countries.

All Cybernet computers are assembled in a ISO:13485 production center to ensure the highest level of quality control, featuring some of the best mean times between failures in the industry.
