

IGEL ADVANCED SERVICES

# IGEL Academy Premium

OS11 training course bundle

IGEL Academy, our Learning Management System (LMS), is the focal point for learning all things IGEL. IGEL Academy enables our partners and customers to reach their goals faster through formally constructed and socially farmed content from throughout the vast IGEL community.

## Why Purchase IGEL Academy Premium?

Access to essential IGEL training is available for free on IGEL Academy, however, if you want your engineers to master the features and functionality of IGEL's platform, a higher level of instruction is required. IGEL Academy Premium opens the door to advanced, hands-on training and certifications that fully enables your staff.

The **IGEL Academy Premium OS11 Course Bundle** contains four advanced courses and two certification exams. A course bundle can be purchased for each named-user who will retain access to the courses until those courses expire.

**IGEL**  **ACADEMY  
PREMIUM**

OS11 training course bundle

## What is IGEL Academy Premium?

IGEL Academy Premium is a bundle of advanced IGEL technical courses and exams. Purchasing an IGEL Academy Premium bundle entitles *one learner* access to the following courses and exams until they are retired:

### IGEL Certified Engineer (ICE)

The IGEL Certified Engineer course is the centerpiece of the IGEL Academy Premium offering.

ICE is an engineer-level course on IGEL products that includes hands-on virtual lab environments matched with self-paced eLearning. Includes a comprehensive exam for certification!

#### SOME COVERED TOPICS:

- Hands-on UMS installation via live labs
- UMS administration
- Active Directory integration
- UMS access control
- Delivery Token activation with the IGEL License Portal (ILP)
- Activating & assigning licenses to endpoints
- Zero-Touch deployment with automatic licensing
- Profile customization & firmware updates
- Deploying files and certificates
- Configuring and using Shared Workplace

## ICEPACKS

An ICEPACK is a supplemental course to the IGEL Certified Engineer (ICE) course that deep-dives into specialized topics. All current and future ICEPACKS for the OS11 platform are included in the Premium bundle. Current ICEPACKS are:

- IGEL Cloud Gateway (ICG)
- Custom Partition Fundamentals

### IGEL Certified Architect (ICA)

The IGEL Certified Architect course is focused on designing and deploying IGEL OS11 infrastructure for complex or scaled environments. Includes a thorough exam for attaining certification!

#### SOME TOPICS COVERED:

- Infrastructure sizing and scaling
- High availability options
- Big Bang vs Drip deployment
- Deployment via SCCM plugin
- Database clustering for DR
- Backup and recovery

### Value that's hard to measure!

Investing in education makes sense. Enable your engineers on IGEL today!

- Access to IGEL Academy is free to everyone: Go to <https://learn.igel.com> and register today! Start with our IGEL Foundations course!
