

# DEVICE CONTROL

Controls and monitors the data flow of your IT systems

The screenshot displays the DriveLock software interface. On the left is a navigation sidebar with categories like Quick access, Dashboard, Security Controls, Inventory, Administration, and Accounts. The main area is titled 'Devices' and contains two bar charts: 'Bus type (Top 10)' and 'Device type (Top 10)'. Below the charts is a table of devices with columns for Device name, Hardware ID, Bus type, and Device type. A right-hand panel shows details for a selected device, including related objects and basic properties.

Device name	Hardware ID	Bus type	Device type
<input checked="" type="checkbox"/> Logitech USB WheelMouse	HID\VID_046D&PID_C00C&REV_2110	HID	Keyboards and Mice
<input type="checkbox"/> Logitech Webcam C930e	USB\VID_046D&PID_0843&REV_0021&Mfg_00	USB	Scanners and cameras
<input type="checkbox"/> Logitech Webcam C930e	USB\VID_046D&PID_0843&REV_0021&Mfg_02	USB	Sound, video and game controller
<input type="checkbox"/> Logitech Wireless Headset	USB\VID_046D&PID_0423&REV_7657&Mfg_00	USB	Sound, video and game controller

# DEVICE CONTROL

Control the use of external media and devices.

## YOUR CHALLENGES

You want to reliably prevent BadUSB attacks.

You want to protect your sensitive data and prevent industrial espionage.

You are using USB flash drives for exchanging data and Bluetooth devices in your company - and need reliable protection.

Your employees are not sufficiently aware of the potential consequences when copying data from external devices to their computers or when charging their cell phones via the USB port.

You would like to train your employees in how to deal with external media..

You require support in meeting the security standards of authorities and critical infrastructures.

You need comprehensive forensic analysis and reporting

## OUR SOLUTION

Controls the use of external devices, drives and Bluetooth devices

Monitors data transfer from and to the external drive

Encrypts USB media automatically and securely

Meets key security compliance standards for Government agencies and critical infrastructures

Provides extensive forensic analysis and granular reporting

Trains employees in the secure handling of data and external media

Integrates into DriveLock Security Awareness Campaigns

## YOUR BENEFITS

- 1 Provides granular control and use of all devices
- 2 Allows only pre-approved devices and external drives
- 3 Prevents data transfer over unencrypted or unauthorized media
- 4 Features comprehensive logging of all events
- 5 Offers a proactive solution by securing your endpoints
